A WWF GLOBAL INITIATIVE WITH BUSINESS

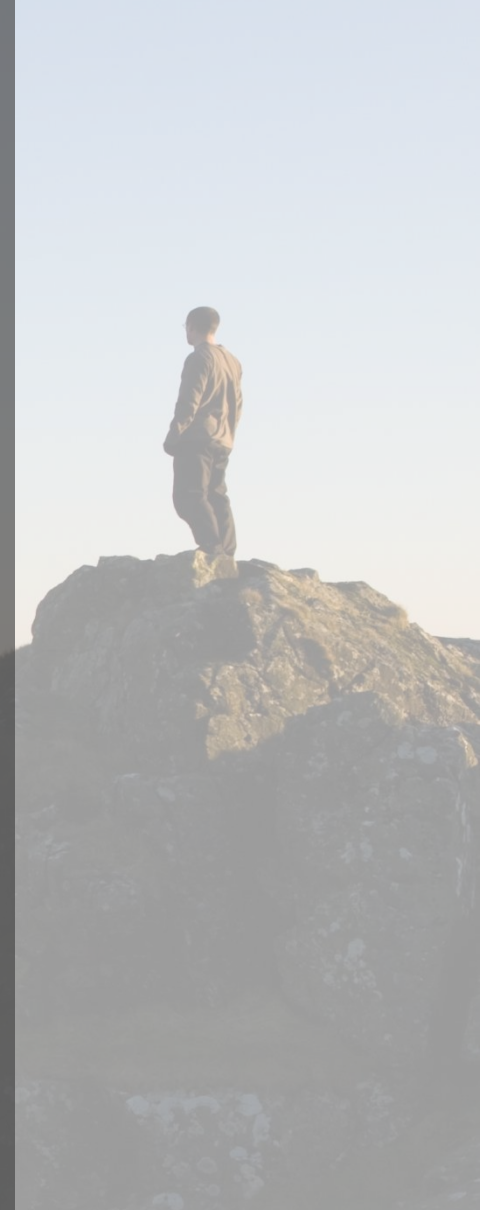

Agenda

Overview

WWF, Volvo and SKF are delighted to invite you to Climate Savers Business Event that will take place in Gothenburg Sweden, on 5 May 2015.

The theme of this year's event is Driving Ambitious Corporate Action. During the event we will focus on the leading role businesses can take in light of the 2015 Conference of the Parties in Paris.

The event will bring together our 29 Climate Savers companies, other industry leaders, and policy experts for discussions and relationship-building. This event will pave the way for further business action to mitigate greenhouse gas emissions and establish new standards of climate protection excellence.
